SUMMARY

As a fresher in the field of Web development, I bring a strong foundation in HTML, CSS, JavaScript, Tailwind CSS, and C++, along with a keen interest in learning and applying new technologies. Although I lack professional experience, I am highly motivated to leverage my skills and contribute effectively to web development projects. With a focus on creating visually appealing and functional websites, I am eager to embark on my career journey and grow as a software developer.

SKILLS

- HTML
- CSS
- Javascript
- C++
- Tailwind CSS
- C
- React
- Git and GitHub

PROJECTS

Personal Portfolio

Source Code | Live Demo

- Design and developed a web app with front-end using HTML, CSS and Javascript.
- This website showcases my projects.

GitHub-Profile-Finder

Source Code | Live Demo

- Developed a dynamic web application using React.js
- Allows users to search and view GitHub profiles.
- Leveraged the GitHub API to fetch user data and implemented features such as search functionality, user profile display, and repository listings.
- Designed an intuitive user interface with modern styling using CSS and responsive layout techniques.

Restaurant Clone

Source Code | Live Demo

- Implemented with HTML, CSS, and JavaScript.
- Showcasing its ambiance, menu offerings, and contact details.
- Ensuring a seamless user experience across devices.
- Features include a menu display, reservation form, and interactive gallery.
